BRAND DESIGN GUIDE

1.0 BRAND LOGO

1.1 **Primary Logo**

The brand logo identifies Anichess brand as a whole.

This logo is a carefully created piece of locked artwork that should not be altered in any way.

The primary logo for Anichess, featuring the word "ANICHESS" in a bold, blue, sans-serif typeface. The letter "A" is stylized with a diagonal cut on its left side. The letters are closely spaced and have a modern, geometric feel.

1.2 Color Variations

Brand logo has several color variations for use on different background types, tones, and colors.

When in doubt, use the most legible version of the logo for the available background.

1.3 Clear Space

Clear space, or negative space, is the area that surrounds the logo that is completely clear of any other graphical element. Clear space helps the logo stand out from the rest of the elements on the page and ensures legibility, even at small sizes.

As a general rule, the more clear, or negative, space around the logo, the better.

At a minimum, there should be clear space equal to the height of “A” on all four sides of the logo.

Visualized Clear Space

1.4 **Icon**

When subtlety is desired, Anichess icon can be used as a separate mark or as a background graphic.

When this mark is used, ensure that our brand name is visible near or in relationship with the icon.

Use the same colors variations as Primary logo.

2.0

VISUAL ELEMENTS

2.1 Core colors

The consistent use of color is vital to effective brand recognition.

Our brand should always be represented in one of the colors on this page, aside from specific recommendations within this guide.

Dark Blue

RGB: 16, 25, 50
HEX: #101932

Picton Blue

RGB: 0, 174, 250
HEX: #00aefa

Cyan

RGB: 0, 255, 251
HEX: #00ffff

Dark Blue

RGB: 16, 25, 50
HEX: #101932

2.2 Secondary colors

We have additional colors that make up our secondary palette. We use these for backgrounds, graphic shapes.

Don not use our secondary colors as body text.

Lavender RGB: 176, 127, 247 HEX: #b07ff7		Slate Blue RGB: 105, 87, 205 HEX: #6957cd
Fuchsia RGB: 255, 95, 244 HEX: #ff5ff4		Dark Violet RGB: 166, 23, 201 HEX: #a617c9
Icterine RGB: 231, 251, 93 HEX: #e7fb5d		Jonquil RGB: 237, 199, 41 HEX: #edc729

2.3 Typeface

TT Firs Neue should be used for every brand execution. In rare circumstances, however, we recognize it is not realistic to use this font. In which case, system default sans-serif fonts should be used: Open Sans.

Note: this should not occur frequently.

2.4 Typography Hierarchy & Weight

The weights listed here are what we typically use most, but feel free to use any appropriate font weight.

Use contrast between heavy and lighter weights to communicate relevant importance, otherwise known as hierarchy, of information.

Heading 1
